

**REMARKS**

Applicant acknowledges the First Action of 26 JUL. 2007 and requests reconsideration of the claims as amended.

Responsive to the Claim Objections on page 2 of the Action, claims 19-20 have been amended for better antecedent basis.

Responsive to the indication, on page 6 of the Action, of allowable subject-matter, independent claims 1, 17 and 31 have been amended to incorporate additional features, previously set forth in dependent claims. For example, claim 1 incorporates a feature of former claim 14 and claim 17 incorporates a feature from claim 30. Claim 31, as amended, recites that the wall of the depression "forms part of the air passthrough." This is supported by specification page 2. This feature is not suggested by the prior art.

Applicants respectfully submit that the claims, as amended, are now clear, and patentably distinguish over HORNG USP 6,726,455, over DE 198 04 255, WO 99-07196, DE 195 03 521 and the other art of record, taken singly or in combination.

No fee is believed necessary in connection with this submission. If any is required, it may be charged to Dep. Account 23-0442.

If the Patent Office notes any remaining informalities which would prevent or hinder examination on the merits, a telephone call to counsel is requested.

Respectfully submitted,

/Milton Oliver/
